

DISCLAIMER

Risk Warning: Our products are complex instruments and come with a high risk of losing money rapidly. 79% of retail investor accounts lose money when trading CFDs with this provider. Funds deposited in a Crowdfunding Activity are intended entirely for the execution of the specific project as detailed in the related Crowdfunding Term Sheet, which forms an integral part of the Client Agreement. You should consider whether you understand how CFDs and Crowdfunding work, including the issuance of non-refundable utility Coins as internal means of value attribution, and whether you can afford to take the high risk of losing your money. Please refer to the Client Agreement and to the Crowdfunding Term Sheet for full details. You are also invited to read our complete Risk Disclosure Statement.

Disclaimer: The products and services offered by **ETIS TECHNOLOGIA CONSULTING DIŞ TİCARET LİMİTED ŞİRKETİ** are not intended for use by residents of any country or jurisdiction where such distribution or use would be contrary to local law or regulation.

The Customer assumes total responsibility for their choices, fully aware of the economic risks associated with any form of use of our Services. Safeguarding the invested capital depends solely on the choices made by the Customer. The results presented relating to the use of our products do not constitute any guarantee concerning hypothetical or similar future profit performance. In particular, the results are the result of the autonomous choices of users and are potentially not replicable. Similarly, the settings used in achieving the aforementioned results are not intended as investment advice, but only as parameters that have proven to be profitable in the context of tests carried out on historical data: there is no guarantee on the part of ETIS on the fact that the same settings can be effective and profitable in the future, or can somehow protect the account from partial or total losses. It remains under the user's full responsibility to invest only capital that he can afford to lose and adopt settings that respond to prudent and sustainable Money Management policies, protecting his trading account and using the appropriate Stop Loss functions if necessary.

With specific regard to Crowdfunding Activities, the Customer expressly acknowledges that: (i) any amount deposited is allocated entirely and irreversibly to the selected Crowdfunding project and may not be refunded; (ii) the receipt of internal Coins is intended as an operational representation of the participation and may not reflect the value of the amount contributed, nor be construed as a financial return or profit expectation; (iii) Coins are not redeemable for legal tender, and although they may be transferred via blockchain where technically possible, their external market value—if any—is entirely outside our control and may fluctuate significantly or be null; (iv) any third parties involved in the execution of the funded activity, such as contractors, service providers or project owners (including social-purpose or benefit corporations), operate independently from ETIS, which acts solely as a technological and administrative incubator of the campaign; (v) we expressly disclaim any responsibility for delays, non-execution, or failure of performance by any third-party beneficiary of the crowdfunding initiative.

By accessing our platform and initiating any transaction, the Customer confirms to have carefully reviewed and fully accepted the Client Agreement, the Crowdfunding Term Sheet applicable to the selected activity, and the present disclaimer.
